

Construction Project Management

The 3-day Construction Project Management (CPM) training course covers the principles, processes, tools and techniques of project management in an engineering and construction context. The Construction Project Management course is validated (No. SACPCMP/CPD/12/023/RV) by the South African Council for Project and Construction Management Professions (SACPCMP) for 15 CPD hours.

The Project and Construction Project Management Professions Act 48 of 2000 requires persons who manage projects within the Built Environment from conception to completion, including management of related professional services, to be registered with the SACPCMP as a Professional Construction Project Manager (PrCPM). The Built Environment includes all structures that are planned and/or erected above or underground, as well as the land utilised for the purpose and supporting infrastructure.

The CPM course has two aims:

- * To prepare construction project managers to apply for and sit the SACPCMP Test of Professional Competency and pass the Professional Interview.
- * To gain Continuing Professional Development (CPD) credits required by SACPCMP to retain the PrCPM status.

This course is based on:

- * The SACPCMP identification of work and scope of services for Construction Project Managers.
- * ISO 21500 : Guidance on Project Management
- * The internationally recognised Project Management Body Of Knowledge (PMBOK® Guide) and its Construction Extension published by the Project Management Institute (PMI®) in the USA. It has been adapted to the South African built environment and covers the entire project life cycle from the Initial Briefing Phase, Concept Phase, Design Phase, Procurement Phase, Construction Phase and Close-out Phase.

Attending the CPM course will provide knowledge and skills to establish a solid framework for consistently managing successful projects by drawing up a comprehensive Project Management Plan covering the following topics:

- * Scope Management
- * Time Management
- * Cost Management
- * Financial Management,
- * Quality Management
- * Human Resources Management
- * Communication Management
- * Risk Management
- * Procurement Management
- * Integration Management
- * Claims Management and Contract Law
- * Health & Safety Management
- * Environmental Management

Who should attend?

Construction Project Managers, Engineers, Consulting and Design Engineers, Engineers-in-Training, Functional Managers, Project Sponsors, Architects, Quantity Surveyors, etc. will find this course invaluable.

2017 Workshop Dates:
6–8 December 2017

Venue: Gauteng
Centurion Lake Hotel, Centurion

Venue: Durban

On Demand

Venue: V&A Waterfront, Cape Town

On Demand

Other venues and dates: In-house courses throughout South Africa can be arranged on sufficient demand (minimum 10 delegates)

Course fee held at ProjectPro venue: = R 13 120 incl. VAT* per delegate

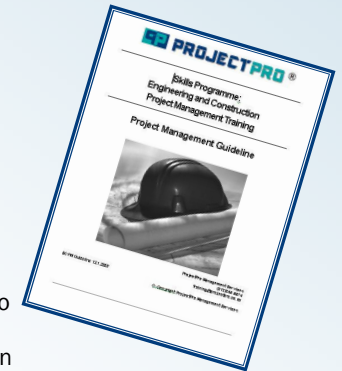

(Includes 3-day course, lunches, teas, comprehensive course manual including a Construction Project Management Guide, Certificate of Achievement and VAT).

* Discount of 10% is offered for third and subsequent candidates on the same workshop and on one invoice.

The full fee is payable one week prior to commencement date.

Cancellations/postponements less than two weeks prior to commencement date cannot be made, however substitutions may be made at any stage. Cancellations/postponements must be made in writing.

NB. Fees and dates may change, so please enquire before registering, or making final travel and accommodation arrangements.
