

Project Management Demystified

Course Overview

This two-day introduction to project management is available for general public attendance or as an in-house course dedicated to learners from one client. Dedicated courses can be customised in both duration and content to suit client preferences. Specific Outcomes are assessed during the course to measure the learning achieved and contributes formative credits towards the Further Education and Training Certificate in Project Management at NQF Level 4.

Target Audience

New entrants to the work or project management environments will benefit from this course, as will work experienced learners who require a coherent overview of the discipline and the ability to immediately put into practise what has been learned. The course is not industry specific (although it can be customised to be so) and will therefore suit learners from all sectors.

Course Objectives

Project Management Demystified is NQF aligned at level 4. It will give learners a clear understanding of the Project Management Body of Knowledge (PMBOK® Guide) 6th Edition. The primary objectives of the course is to provide learners with:

- * A foundation of basic project management skills which can be used to build further project management related competencies
- * Competence to be an effective project team member
- * Competence to execute small, simple projects
- * Competence to provide assistance to a project manager on larger projects
- * An understanding of how to put into practice the essential tools and techniques of project management
- * A sound grounding for progression to higher-level project management career path development.

Accredited Project Management Training

Learning Outcomes

Learners are introduced to the knowledge areas and processes of a project. The course covers:

- * The nature of projects and history of project management
- * Planning and executing projects in a sequential step-by-step manner
- * The Project Hall of Fame – lessons learnt from successes and disasters
- * The competencies of a successful project manager
- * The role of the Project Management Plan
- * Understand Project Management Process Groups, write a scope statement, understand activity relationships, compile a dependency table and construct a network, barchart and cashflow curve.
- * Project processes, life cycles, phases, Responsibility Assignment Matrix
- * Project planning exercises: the Redecorating Project and the Kruger Millions Project
- * Team assignments: Develop a Work Breakdown Structure (WBS) and do a Risk Analysis
- * A guided tour through the latest PM software incl. Microsoft Project, Precedence Networking, Critical Path Analysis
- * Video case studies in planning and execution. Injaka Bridge collapse case study assignment.
- * Quality principles and trade-offs
- * Overview of Contract Law
- * Project Close-out, lessons learnt, continuous improvement, dimensions of project success
- * Formative knowledge assessment.

Learners will receive a course manual, a copy of the ProjectPro Project Management Guideline, free subscription to ProjectPro e-News, e-Library and a ProjectPro certificate of achievement. Lunch & refreshments are included.
