

Engineering & Construction Project Management

The Engineering and Construction Project Management (ECPM) training course is a 3-day intermediate level course covering the principles, processes, tools and techniques of project management in an engineering and construction context.

This course is based on the internationally recognised Project Management Body Of Knowledge (PMBOK® Guide) and its Construction Extension published by the Project Management Institute (PMI®) in the USA. It has been adapted to the South African built environment and takes the learner through the entire project life cycle from the Initial Briefing Phase, Concept Phase, Design Phase, Procurement Phase, Construction Phase and Close-out Phase.

The ECPM course is validated by the South African Institute of Civil Engineers (SAICE) the validation number is SAICEproj13/01454/16 and contributes 3 credits or 15 hours towards Continuing Professional Development (CPD) as required by the Engineering Council of South Africa (ECSA) for engineers to retain their professional engineer registration.

Accredited Project Management Training

Attending the ECPM course will enable learners to establish a solid framework for consistently managing successful projects by drawing up a comprehensive Project Management Plan covering the following management aspects:

- * Scope Management
- * Time Management
