

EARN VALUE MANAGEMENT (EVM)

COURSE OVERVIEW

Imagine a technique that's like switching on the floodlights to illuminate your entire project. If you spot any warning signs, this technique allows you to focus a spotlight on the problem area. If that isn't enough, turn on the Cost Performance Index which is like a crystal ball to predict what your final project cost is likely to be. This enlightening performance measurement technique is called "Managing with the lights on" or Earned Value Management (EVM).

WHO SHOULD ATTEND?

Earn Value Management is intended for any practitioner who wants to expand their toolset and use EVM to improve project performance. Especially those who deal with cost and scheduling. Those who would like to earn Professional Development Units (PDU's) for PMP® recertification may also attend.

ACCREDITATION

ProjectPro is an accredited training provider with the Services Seta (SETA) no.097, a Registered Education Provider (REP) no. 3618 with the Project Management Institute (PMI)® and Project Management South Africa (PMSA) no. 0027

BENEFITS

Earned Value Management gives you an early warning if all is not well. For instance, the people working on critical path activities may be on schedule, but the project manager is unaware that many of the non-critical activities are rapidly using up their float. Too late the project manager realises that the critical path has already jumped to two other activity paths and the entire project is delayed. EVM monitors the schedule performance of every activity and of the project as a whole.

WHY OUR COURSE?

ProjectPro aim to promote excellence in project management through providing high quality services and accredited training and assessment, to the standards and global project management best practices of:

- ◆ South African Qualifications Authority (SAQA)
- ◆ International Organisation for Standardisation (ISO)
- ◆ Project Management Institute (PMI)

The course content is based on the Project Management Institute's Practice Standard for EVM and will earn delegates eight Professional Development Units (PDU) for PMP® recertification.

ProjectPro® Earn Value Management offers a one-day workshop which covers EVM technique and also includes a revolutionary new enhancement called Earned Schedule (ES).

Using this new technique ensures that the Schedule Performance Indices and Variances remains relevant throughout the entire project life cycle. ES retains the actual schedule slippage on project completion, which is not the case using traditional EVM.

Project management's best kept secret

There is nothing inherently difficult about the earned value concept. It does not require extensive training to grasp the fundamentals. In fact, many people are using some form of earned value in their daily routines and are not even aware that they are employing the concept.

ProjectPro's training and consulting efforts promote the earned value concept in a simple manner so that it can be applied to any project, of any size, and in any industry.

For many years ProjectPro has been promoting the benefits of EVM by training our ProjectFlow and Project Management Professional course delegates in the use thereof.

Date: On Request

Venue: Centurion Lake Hotel, Gauteng

Earned Value Management (EVM)

COURSE PROGRAMME

COURSE CONTENT

- ◆ Recount the brief history Earned Value Management (EVM)
- ◆ Define EVM
- ◆ Understand how EVM supports performance measurement
- ◆ Understand the EVM terminology
- ◆ Differentiate between performance indices and variances
- ◆ Understand the steps in applying EVM
- ◆ Use various reporting formats
- ◆ Cost forecasting using EVM
- ◆ Apply Earned Schedule
- ◆ Use Microsoft Project to implement EVM.
